EDUCATION

The University of Texas at Dallas, Richardson, TX — Expected May 2028

Bachelor of Science, Computer Science

- Coursework: Software Engineering, Machine Learning, Computer Architecture, Data Structures, Artificial Intelligence
- Erik Jonsson Academic Success Scholarship Recipient

TECHNICAL SKILLS

- Languages: **Java, Python, C++, C, SQL, JavaScript, TypeScript**
- Frameworks/Tools: **React, Next.js, Node.js, Spring Boot, Firebase, Tailwind CSS, Git, Figma, RAG, RestAPIs, NumPy, PyTorch**

PROFESSIONAL EXPERIENCE

Kairos Technologies – *Forward Deployed AI Intern* — June 2026 – Aug 2026

- Engineered a **real-time AI voice agent** for a dental front desk **using Claude Sonnet/Haiku, Whisper STT, and an offline RAG pipeline**, reducing staff call-handling time by ~18%.
- Built an **agentic AI inventory system** with autonomous planning, tool use, and error recovery, achieving **100% correct escalation** across a 10-scenario adversarial test suite.
- Engineered an **ingestion and retrieval pipeline with a custom web crawler, Voyage AI embeddings** in a Chroma vector store, and citation-enforced prompting to constrain generation to retrieved context.

Tomorrow's Leaders Today – *Software Developer Intern* — Aug 2025 – Dec 2025

- Developed a full-stack web application using **Next.js, Node.js, SQLite, & Prisma** and created an automated grant application that tracked grants received/applied for this company, overall increasing efficiency by **45%.**
- Designed an **Application History sector** that displayed previous grant applications and its details on the grant application using **HTML/CSS, React, Figma, and Tailwind**, which increased reliability and accessibility by **31%.**

Darling Ingredients - *Software Engineering Intern* — June 2024 – Aug 2024

- Built an **internal data pipeline in Python** to automatically collect, clean, and process supply chain data from multiple sources, replacing a manual workflow and reducing reporting time by 35%.
- **Wrote and optimized SQL queries** to efficiently manage and retrieve data across large internal databases, improving query response times by 30% for frequently accessed records.

RESEARCH AND PROJECTS

PropSim - Sports Prediction Engine — July 2026 – Sep 2026

- Engineered **a C++ Monte Carlo simulation engine** (30M+ simulations/sec via pybind11) to model player and game outcomes, deployed with a **Python, FastAPI, React, and Docker stack** to flag betting edges above 5% between simulated and sportsbook-implied probabilities.
- Backtested the model against 70,000+ historical player-games across three NBA seasons using a SQLite-backed pipeline, achieving a 62.3% prediction hit rate versus the sportsbook's 52.4% break-even threshold.

URAP Apprenticeship - *Undergraduate Research Assistant Program* — Feb 2026 – Aug 2026

- Preprocessed and engineered features from SNOTEL and NOAA weather data across five real-world watersheds and trained **a two-layer LSTM with Huber loss, gradient clipping, and log transforms** to stabilize training on heavy-tailed discharge distributions, achieving R^2=0.954 on the best-performing site.
- Coupled the LSTM with a **Dual Adaptive Conformal Prediction framework** to generate calibrated uncertainty intervals across four coverage targets (70–95%), achieving near-target coverage on three of five sites and maintaining 91.8% coverage at the 95% target even on the weakest base model (R^2=0.405).

CarCare – *Association of Computing Machinery* (ACM) — Feb 2026 – May 2026

- Developed CarCare using **React, JavaScript, Spring Boot, and Firebase Authentication**, while also implementing **OCR-based scanning and an AI chatbot with OpenAI API**, improving issue detection accuracy through real-time automated assistance.
- Integrated the **Google Maps API and interactive 3D vehicle model**s, increasing user engagement and service discovery efficiency via visual diagnostics and nearby repair shop recommendations.

CAMPUS INVOLVEMENT

Kappa Theta Pi, Director of Industry Relations — May 2026 - Present

- Lead chapter industry relations efforts by cultivating strategic partnerships with companies, securing guest speakers, sponsorships, and internship opportunities, and collaborating with executive leadership to design and execute professional development programming for all brothers.

AIMD, *Project Manager* — Aug 2025 - Dec 2025
